Rehabilitation Care Center ............... 49
Welcome to Catholic Health Services.

Catholic Health Services (CHS) is an integrated system encompassing some of the region’s finest health and human services agencies. With six acute care hospitals, three nursing homes, a home nursing service, hospice and a community-based agency for persons with special needs, CHS’s high standards have resulted in excellent patient satisfaction. In 2013, CHS facilities handled more than 80,000 hospital admissions, 5,500 newborn deliveries, 236,000 emergency department cases and tens of thousands of rehabilitation visits, as well as 300,000 home care visits, and day and residential services for 2,150 individuals with special needs.

Our commitment to quality is recognized by patients and independent health agencies. All six CHS hospitals are designated stroke centers, have The Joint Commission Gold Seal of Approval® and received the 2013 Get With The Guidelines® Stroke Gold Plus award. In its spring 2014 ranking, Consumer Reports named St. Francis number one on Long Island, and four of six CHS hospitals placed in the top third for the New York Metro area. For 2011–2013, St. Joseph was recognized by the American Nurses Association’s National Database of Nursing Quality Indicators® for Outstanding Commitment to Quality Patient Care. St. Francis was ranked by U.S. News & World Report number nine in the entire nation for cardiology and heart surgery and is the top-ranked hospital on Long Island again (2014–2015). Also, Good Samaritan and St. Charles earned a place among the Best Hospitals for 2014–2015, as ranked by U.S. News & World Report. St. Catherine of Siena Medical Center has been honored by Physicians’ Reciprocal Insurers for patient safety best practices. Mercy Medical Center was named 1 of the 100 Great Community Hospitals by Becker’s Hospital Review and, along with St. Charles, was named a Top Performer on Key Quality Measures™ by The Joint Commission in 2013.

CHS’s continuing care division has achieved honors, too. Catholic Home Care has been ranked by HomeCare Elite™ within the top 25% of home health agencies in the entire country. Good Shepherd Hospice volunteers continually earn the Hospice and Palliative Care Association of New York State’s Volunteer Service Award. Maryhaven programs have earned the highest level of accreditation from the Commission on Accreditation for Rehabilitation Facilities. Our Lady of Consolation and St. Catherine of Siena nursing facilities were again recognized as among the Best Nursing Homes in the nation by U.S. News & World Report for 2014–2015. In addition, Our Lady of Consolation earned the 2014 Pinnacle Award for Quality and Patient Safety from the Healthcare Association of New York State.

As a system, CHS was recently awarded the Most Wired designation from the American Hospital Association, as noted in Hospitals & Health Networks. We share this information with you to assure you of our dedication to quality and patient safety. Our goal is to ensure that you and your loved ones receive the best care possible delivered by caring professionals.

CHS is a multifaceted system, encompassing a wide array of programs across Long Island. Whether you are looking for services for yourself or others, we encourage you to use this guide to find the program or service you need, close to home.

Wishing you good health,

Alan D. Guerci, MD
President & CEO, Catholic Health Services
Mission Statement

Catholic Health Services of Long Island (CHS), as a ministry of the Catholic Church, continues Christ's healing mission, promotes excellence in care and commits itself to those in need.

CHS affirms the sanctity of life, advocates for the poor and underserved, and serves the common good. It conducts its health care practice, business, education and innovation with justice, integrity and respect for the dignity of each person.

Please visit each CHS member’s website for the most current information. Simply go to www.chsli.org and click through.

Good Samaritan Hospital Medical Center

Founded in 1959, Good Samaritan Hospital Medical Center has grown into a 537-bed (including 100 nursing home beds) medical center, with more than 3,500 employees and almost 900 physicians on staff. Good Samaritan’s approximately 24,000 patient admissions, 2,800 babies delivered, more than 14,000 operations (including 8,500 same-day surgeries), almost 80,000 home care visits and more than 147,000 diagnostic imaging procedures—as well as nearly 90,000 Emergency Department visits and almost 4,000,000 laboratory tests—annually illustrate the medical center’s unrivaled experience. Good Samaritan has earned The Joint Commission’s Gold Seal of Approval® and the Commission on Cancer’s Outstanding Achievement Award. It is also a Magnet® designated hospital and was ranked again among the Best Hospitals by *U.S. News & World Report* (2014–2015).

As part of the St. Francis Open Heart Surgery Program at Good Samaritan Hospital, cardiothoracic surgeons, anesthesiologists, nurses, perfusionists and other experts from St. Francis Hospital, The Heart Center®, are on site to offer this nationally recognized open heart surgery program to residents of Suffolk County. They have expertise in all types of heart surgery, from conventional open heart bypass and off-pump coronary artery bypass to the newest minimally invasive valve procedures, including surgical techniques designed to treat certain cardiac arrhythmias.
Good Samaritan, a NYS Designated Level II Trauma Center since 1995, provides trauma care to nearly 2,000 people each year. As part of its commitment to offering the best care possible, the hospital has taken on the challenge of becoming one of the first in the state to be reviewed by the American College of Surgeons Committee on Trauma (ACS-COT) for verification as an ACS-COT Level II Trauma Center, the standard for high-quality trauma care.

Good Samaritan was among the first community hospitals in Suffolk County to perform primary angioplasty to swiftly open blocked arteries during a heart attack and was the first in the county to offer the combination of primary or elective angioplasty and a cardiac rehabilitation program. A recipient of the American Heart Association’s Get With The Guidelines® Heart Failure Gold Performance Achievement Award, Good Samaritan has expanded its Division of Cardiology to better focus on the individual needs of cardiac patients.

The hospital’s BirthPlace provides expert care to women experiencing high-risk pregnancies. The Maternal Fetal Medicine Program cares for women whose pregnancies are complicated by premature labor or underlying medical conditions such as diabetes or high blood pressure, or due to a multiple birth. Specialists work closely with neonatologists to ensure the health of both mother and baby.

Good Samaritan provides dedicated pediatric services, including the first fully designated Pediatric Emergency Department in Suffolk County. The hospital also has the only Level III Neonatal Intensive Care Unit on the south shore of Suffolk. Good Samaritan’s freestanding, outpatient Center for Pediatric Specialty Care and Sleep Disorders is the largest of its kind in Suffolk County. Located in Babylon, it is staffed by physicians with a wide variety of expertise, including pulmonology, endocrinology, cystic fibrosis, gastroenterology, infant/child development, nutrition, infectious disease, neurology, nephrology, hematology, surgery and sleep disorders, supporting more than 30,000 patient visits a year. The facility has further expanded services to enhance the family-centered care of medically complex children.

Good Samaritan’s Cancer Center offers a complete range of preventive, diagnostic, therapeutic and supportive services, enhanced by a cancer patient navigation program. Accredited by the American College of Surgeons Commission on Cancer, Good Samaritan earned the Outstanding Achievement Award with a three-year commendation on three consecutive surveys (nine years in a row).

Good Samaritan’s Ambulatory Surgery Unit (ASU) meets the needs of adult and pediatric patients who are able to return home the same day. Procedures are performed by board certified surgeons in dedicated operating rooms, with
pain management suite. In addition, the ASU is designed to accommodate patients undergoing special procedures such as cardiac studies, interventional radiology procedures and blood transfusions. There is also an endoscopy unit, equipped and staffed to provide expert gastroenterological care to both adults and children.

With advanced mammography—including Suffolk County’s first 3-D tomosynthesis technology—and other breast diagnostic services, Good Samaritan is a Breast Imaging Center of Excellence, as awarded by the American College of Radiology. The medical center has earned a three-year, full accreditation designation by the National Accreditation Program for Breast Centers.

The hospital offers comprehensive, patient-focused imaging services on an outpatient and inpatient basis and earned three-year reaccreditation by the American College of Radiology. This reflects Good Samaritan's high practice standards, including the caliber of work being performed by physicians, medical physicists and other experts, as well as efficiency, quality assurance programs and adequacy of space.

**Highlights**

- Good Samaritan is a Magnet® designated hospital, professional nursing’s highest honor, achieved by fewer than 7% of U.S. hospitals.
- The Bariatric Surgery Program at Good Samaritan is fully accredited as a Comprehensive Bariatric Surgery Center by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP).
- American Academy of Sleep Medicine Center of Excellence.
- First hospital on the south shore of Suffolk County to earn NYS Designated Stroke Center designation and a recipient of the American Heart Association/American Stroke Association Get With The Guidelines® Stroke Gold Plus and Heart Failure Gold Performance Achievement Awards.
- Certified by the American Association of Cardiovascular and Pulmonary Rehabilitation, with Quality Respiratory Care Recognition in three consecutive years.
- Outstanding Achievement Award from the American College of Surgeons Commission on Cancer (nine consecutive years).

Mercy Medical Center

Founded by the Nursing Sisters of the Congregation of the Infant Jesus, Mercy Medical Center has served the residents of Nassau County and nearby communities since 1913. Mercy is a full-service, 375-bed community hospital with a medical staff of nearly 700 physicians and almost 1,600 employees. From nursing services and comprehensive stroke and cancer care, to women's health services and weight-loss surgery, top ratings in national assessments make Mercy the hospital of choice for patients 100,000 times a year.

Mercy received an “A” for patient safety in The Leapfrog Group’s Hospital Safety Score™ in 2014. In 2013, it was ranked a Top Performer on Key Quality Measures™ by The Joint Commission, based on 2012 data. Mercy also was named one of the 100 Great Community Hospitals by Becker’s Hospital Review in 2013 and has earned the Pathway to Excellence® designation by the American Nurses Credentialing Center. The hospital provides 24-hour emergency and trauma care for both adults and children, as well as Express Care for less urgent cases, and its advanced diagnostic facilities include a cardiac catheterization lab, magnetic resonance imaging (MRI), positron emission tomography (PET) and computed tomography (CT). Mercy has received the Get With The Guidelines® Stroke Gold Plus Performance Achievement Award from the American Heart Association/American Stroke Association and is also a NYS Designated Stroke Center.

Mercy earned the 2013 Outstanding Achievement Award from the Commission on Cancer of the American College of Surgeons, and the hospital has been designated a Breast Imaging Center of Excellence by the American College of
Radiology. Mercy’s Bishop John R. McGann Radiology and Imaging Center features enhanced amenities, including a spacious reception area, along with a new private waiting area for a full complement of women’s imaging services. Mercy is a leader in providing comprehensive breast health care—with screening, diagnosis, treatment and follow-up all at one location, the Women’s Imaging Center. Highly skilled radiologists and breast surgeons offer a complete range of treatment options and the latest full reconstructive procedures. Also, to assist those who are newly diagnosed, “living with” or survivors of cancer, Mercy has partnered with the American Cancer Society to offer the free Patient Navigation Program.

With the largest dedicated inpatient acute rehabilitation program on the south shore of Nassau, Mercy employs state-of-the-art equipment and techniques to speed the recovery of patients who have suffered a catastrophic illness, stroke, spinal cord injury, amputation, major orthopedic surgery, severe disabling arthritis or acquired brain injury. Ambulatory services are now offered, as well, in a beautiful outpatient facility to address all rehabilitation needs. Physiatrists, physical and occupational therapists, and speech-language pathologists can diagnose and treat a wide variety of disabilities, and the Balance Center helps those experiencing dizziness, vertigo and related issues.

Mercy delivers more than 1,200 babies each year and is home to the only Level III Neonatal Intensive Care Unit on the south shore of Nassau County, with 24/7 in-house neonatologists/pediatricians, anesthesiologists and obstetrician attending physicians. Generations of women have chosen to have their babies in an environment recognized for superior, personalized care. Mercy is committed to providing single occupancy in the home-like setting of its redesigned maternity suites.

The hospital is widely known for its leadership in weight-loss surgery and is an accredited center of the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program. Mercy offers single-incision laparoscopic surgery (SILS) for weight loss—as well as for abdominal and gynecologic procedures—and the latest techniques in minimally invasive brain and spine surgery.

The spiritual needs of patients and their families are an integral part of care at Mercy Medical Center, with a pastoral care staff committed to addressing the needs of the whole person—body, mind and spirit. Chaplains are members of the health care team, providing support and counseling with bedside visits and family conferences. The Sacrament of Reconciliation, Anointing of the Sick and Holy Communion are offered to Catholic patients. Mass is celebrated in the hospital chapel and is also available to patients in their rooms via closed-circuit television. A nondenominational meditation room is available, as are a Muslim prayer room and a kosher kitchen, orthodox shul and hospitality rooms for emergency, short-term or Sabbath stays for observant Jewish family members of patients.
Highlights

• Awarded an “A” in The Leapfrog Group’s Hospital Safety Score℠ (2014).
• 2013 Outstanding Achievement Award from the American College of Surgeons Commission on Cancer.
• Ranked a Top Performer on Key Quality Measures™ by The Joint Commission in 2013, based on 2012 data.
• Named one of the 100 Great Community Hospitals by Becker’s Hospital Review.
• Get With The Guidelines® Stroke Gold Plus Performance Achievement Award from the American Heart Association/American Stroke Association.
• American Nurses Credentialing Center Pathway to Excellence® designation.
• Ranked among RT magazine’s Best of 2013 Respiratory Care Departments.
• Breast Imaging Center of Excellence, as designated by the American College of Radiology.
• The Bariatric Surgery Program at Mercy is fully accredited as a Comprehensive Bariatric Surgery Center by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP).
• First on Long Island to use SILS techniques for LAP-BAND® adjustable gastric banding and sleeve gastrectomy.
• Largest inpatient acute rehabilitation program of its kind in south Nassau.
• For 2012–2013, Mercy was ranked by U.S. News & World Report as a leader in orthopedics and was rated “superior” in patient safety.
• The Joint Commission Gold Seal of Approval®.

Since 2000, St. Catherine of Siena Medical Center has been a trusted health care resource. St. Catherine of Siena is located on 110 acres on the north shore of Long Island, in Smithtown. The campus comprises a 318-bed, not-for-profit hospital, a 240-bed skilled nursing and rehabilitation care center, a 298-unit senior housing facility and a 3-story medical office building.

St. Catherine is committed to providing patients with quality health care they can trust. The medical center continually focuses on improving patient care and quality outcomes, and the dedicated staff of professionals strive to meet or exceed the needs and expectations of patients and their families each and every day. St. Catherine has demonstrated a commitment to transparent accountability and ongoing improvement and was awarded an “A” for patient safety from The Leapfrog Group, as measured by the Hospital Safety Score℠, in 2012 and 2013.

St. Catherine’s Women’s Health and Outpatient Diagnostic Pavilion, located on campus, offers women comprehensive health care in one location. Diagnostic services include breast magnetic resonance imaging (MRI) and breast MRI biopsy, breast ultrasound, fine needle aspiration, galactograms, high-quality digital
mammography, needle localization, stereotactic core breast biopsy, sentinel lymph node biopsy, ultrasound-guided cyst aspiration, ultrasound-guided needle biopsy and bone densitometry. While the pavilion is dedicated to women's health needs, diagnostic testing is available for men as well. The medical center also provides comprehensive breast health services, from diagnosis to reconstructive surgery.

The Department of Radiology is accredited by the American College of Radiology in MRI, computed tomography (CT), ultrasound, breast ultrasound, ultrasound-guided breast biopsy, vascular ultrasound, mammography and stereotactic breast biopsy. St. Catherine is designated a Breast Imaging Center of Excellence by the American College of Radiology.

St. Catherine’s Colon and Rectal Program offers treatment for the full range of diseases and conditions of the small bowel, colon, rectum and anus, from cancer to hemorrhoids. The program is staffed with nationally recognized, board certified colorectal surgeons, including both male and female physicians. They have expertise in the use of endoscopic and laparoscopic procedures and other minimally invasive techniques, including robotic surgery, to treat colon and rectal disorders. A new minimally invasive and reversible procedure was recently introduced, providing an option for those suffering with fecal incontinence.

The medical center’s Diabetic and Wound Healing Center specializes in helping patients, including those with diabetes, whose wounds have reached a plateau and may be at risk for complications. Dedicated staff create a personalized treatment plan for patients using the latest techniques for the most effective and expedited recovery. The center will soon offer hyperbaric therapy.

St. Catherine’s Sleep Disorders Center provides comprehensive, individualized evaluation and testing for the diagnosis and treatment of clinical disorders related to sleep. Each patient undergoes sleep testing in one of four specially designed bedrooms, accessible to the physically challenged. Self-referrals are accepted at the center, which is open 24 hours a day, Monday to Saturday, but most patients are referred by a physician.

Highlights

- Achieved the American Heart Association/American Stroke Association Gold Plus award for excellence in quality for stroke and TIA management (2010–2013). In addition, St. Catherine also received Honor Roll recognition for thrombolytic management of acute ischemic stroke in 2011 and 2013.

- Named a Breast Imaging Center of Excellence by the American College of Radiology.
• “A” for patient safety from The Leapfrog Group, as measured by the Hospital Safety Score® in 2012 and 2013.

• First hospital-based facility on Long Island to be awarded three-year certification by the American Society for Gastrointestinal Endoscopy’s Endoscopy Unit Recognition Program, with recertification earned in 2014.

• The only community hospital on Long Island, and 1 of 36 in the country, awarded the U.S. Department of Health and Human Services Outstanding Leadership Award for Achievements in Eliminating Ventilator-Associated Pneumonia, May 2011.

St. Charles Hospital

St. Charles Hospital has served the residents of the north shore in the Town of Brookhaven since 1907. St. Charles is a full-service, community hospital and regional rehabilitation center with eight outpatient satellite rehabilitation sites, from Albertson to Port Jefferson. The 231-bed hospital includes 59 medical/surgical beds, 16 intensive care/critical care beds, 8 pediatric beds, 6 neonatal and 22 maternity beds, 40 alcohol and chemical dependency beds, 10 medically supervised detoxification beds and 80 physical medicine/rehabilitation beds. Ranked again among the Best Hospitals by *U.S. News & World Report* (2014–2015), St. Charles is renowned for high-quality, compassionate care. In 2013, it was named a *Top Performer on Key Quality Measures™* by The Joint Commission for the third consecutive year, among just 45 hospitals in New York so recognized, based on 2012 data.

With a rehabilitation program that has achieved the highest level of certification available, St. Charles is the only hospital on Long Island accredited by the Commission on Accreditation for Rehabilitation Facilities for both inpatient and outpatient, adult and pediatric rehabilitation. The pediatric rehabilitation unit has the only inpatient pediatric traumatic brain injury unit on Long Island. In addition, St. Charles is a NYS designated traumatic brain and spinal cord injury center for both adults and children. The sophisticated rehabilitation techniques used at St. Charles include virtual-reality technology for physical therapy and an electrical stimulation device for the hand and/or leg that allows stroke patients to grasp objects and walk without foot drop.
St. Charles was the first hospital in New York to introduce computer-assisted orthopedic surgery when performing a total knee arthroplasty. St. Charles went on to become the first hospital in the region to perform computer-assisted surgery (CAS) on an anterior cruciate ligament and the first in the U.S. to perform a reverse ball and socket total shoulder replacement. Also, it was the first hospital in the Northeast to provide a total hip replacement with computer assistance. With Joint Commission certification for its total hip and knee replacement program, the hospital performed more than 500 total joint replacement surgeries in 2013. In 2014, St. Charles became the first Long Island hospital to offer MAKOplasty partial knee resurfacing.

Each year, approximately 1,500 babies are born at St. Charles. The experienced and skilled obstetricians and labor/delivery nurses at St. Charles have, on average, more than 12 years of experience in labor and delivery. Additionally, board certified neonatologists and nurse practitioners provide 24-hour-a-day coverage in the Neonatal Intensive Care Unit to ensure that newborns with special needs receive the highest level of care. The Mother/Baby Couplet Program, unique to St. Charles, allows one nurse to care for the mother and baby, instead of the traditional model of a postpartum nurse caring for the mother and a nursery nurse taking care of the newborn. This program allows families to bond with their newborns by becoming more involved in the care of infants during the first days following birth.

The hospital provides diagnostic imaging on an outpatient and inpatient basis, performing more than 60,000 procedures annually. St. Charles offers advanced digital mammography, diagnostic needle localization, X-ray, ultrasound, stereotactic breast biopsy, breast magnetic resonance imaging (MRI), and biopsy and ultrasound of the breast. Other outpatient services include comprehensive radiography for skeletal, abdominal, chest, genitourinary and gastrointestinal diagnostic testing, full computed tomography/angiography (CT/CTA), nuclear medicine, nuclear stress testing, ultrasound and magnetic resonance angiogram (MRA)/MRI. The Diagnostic Imaging Department at St. Charles features a 3.0 Tesla MRI and a 256-slice CT scanner and has earned a three-year, full accreditation designation by the American College of Radiology.

Due to the growing number of adult and pediatric patients in need of surgical services, an $8 million expansion of an existing operating room suite at St. Charles added 4 operating rooms. The new structure is adjacent to the original five ORs and features a highly skilled surgical staff, advanced equipment and more space, creating one of the most technologically advanced surgery centers in the area.

Patients’ spiritual needs are very important at St. Charles. A full-time chaplain and deacon, a priestly presence and pastoral care volunteers are available daily to enhance a living faith for all denominations. This includes support and prayerful meditation for staff, patients and family members when they need it most.
Catholic Health Services of Long Island

The physicians in the Emergency Department at St. Charles are all board certified in emergency medicine and available 24 hours a day. Additional services provided at St. Charles include general surgery, bariatric surgery, a state-of-the-art Sleep Disorders Center, medically supervised detoxification, pediatric services and the Comprehensive Epilepsy Center of Long Island, as well as pediatric orthopedic, female urinary incontinence and laboratory services.

Highlights

- St. Charles was named a *Top Performer on Key Quality Measures℠* by The Joint Commission for the third consecutive year in 2013.
- The Total Hip and Knee Joint Replacement Program at St. Charles is Joint Commission certified and is an Empire Blue Cross/Blue Shield Blue Distinction Center for Total Joint Replacement®.
- St. Charles is Joint Commission certified as a stroke center and is a recipient of the American Heart Association/American Stroke Association Gold Plus and Silver (respectively) Performance Achievement Award for success in using Get With The Guidelines® to improve quality of care for stroke and heart disease. St. Charles was also the first hospital in Suffolk County to become a NYS Designated Stroke Center.
- 2013 Physicians’ Reciprocal Insurers (PRI) Patient Safety Award.
- Recognized by the American Academy of Sleep Medicine as a full-service sleep disorders center and a Sleep Center of Excellence.
- St. Charles’s rehabilitation program received the highest level of accreditation available from the Commission on Accreditation for Rehabilitation Facilities (CARF) for adult and pediatric inpatient and outpatient services and the stroke rehabilitation program.
- The hospital earned the 2012 American College of Surgeons Commission on Cancer Approval Award with Commendation.
- The Bariatric Surgery Program at St. Charles is fully accredited as a Comprehensive Bariatric Surgery Center by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP) and accredited as a Comprehensive Center with Adolescent Qualifications by MBSAQIP.

St. Francis Hospital, The Heart Center®, is New York’s only specialty designated cardiac center and is a nationally recognized leader in cardiac care. Founded in 1922 by the Sisters of the Franciscan Missionaries of Mary, the 306-bed hospital is an innovator in the delivery of specialized cardiovascular services in an environment where excellence and compassion are emphasized. Also, St. Francis offers an outstanding program in noncardiac surgery, including some of the most advanced technology and minimally invasive techniques available for vascular, prostate, ear-nose-throat, abdominal, gastrointestinal, oncologic and orthopedic surgery.

St. Francis Hospital performs more cardiac surgeries than any other hospital in the entire state and has been consistently recognized for its outstanding quality of care. For 2014–2015, St. Francis was top-ranked on Long Island again by U.S. News & World Report and listed ninth in the entire nation for cardiology and heart surgery. St. Francis has been ranked one of the Best Hospitals in America for the eighth consecutive year and is one of only three hospitals in the New York Metro area to make the top 10 in cardiology and heart surgery, besides being ranked nationally for four additional specialties. St. Francis is also among just 7% of U.S. hospitals to hold the coveted Magnet® designation for nursing excellence and has earned the gold-level Beacon Award for Excellence from the American Association of Critical-Care Nurses.
Highlights

- In the past decade, more than 123,000 cardiac catheterizations, 34,000 angioplasties and 15,000 open heart surgeries have been performed at St. Francis Hospital. Studies consistently show that patients fare better when they go to physicians and hospitals that perform a high volume of procedures.

- St. Francis performs one of the highest volumes of cardiac arrhythmia procedures in the nation, including radiofrequency ablation, and pacemaker and defibrillator implantation. The hospital was the first on Long Island to implant a leadless pacemaker.

- Awarded an “A” in The Leapfrog Group’s Hospital Safety Score\textsuperscript{SM} (2014).

- \textit{Consumer Reports} rated St. Francis the top hospital in the NYC Metro area for patient safety (2014).

- St. Francis has more top doctors for cardiac care on \textit{New York} magazine’s Best Doctors list than any other hospital in Nassau County (2014).

- More than 99 of 100 patients say they would recommend St. Francis to a family member or friend (Press Ganey).

- The hospital was top-rated for overall inpatient satisfaction among large hospitals surveyed by HealthStream Research\textsuperscript{™}, a leading patient satisfaction assessment company (2013).

- The hospital’s DeMatteis Center for Cardiac Research and Education in Greenvale received the Summit Award from Press Ganey for outstanding patient satisfaction three times.

- Three of St. Francis’s intensive care units have earned the gold-level Beacon Award for Excellence from the American Association of Critical-Care Nurses.

St. Francis Hospital is located in Roslyn, on Long Island’s north shore, and is easily accessible from Northern Boulevard and the Long Island Expressway.

Magnet\textsuperscript{®} is a registered trademark of the American Nurses Credentialing Center. All rights reserved.

\section*{Directory}

\textbf{Arrhythmia and Pacemaker Center} . . . . . (516) 562-6672

St. Francis has a leading national program for pacemaker and defibrillator implantation and the diagnosis and treatment of cardiac rhythm abnormalities. The center has unparalleled expertise in radiofrequency cardiac ablation, including treatment of atrial fibrillation, and it performs one of the highest volumes of arrhythmia procedures in the U.S., with an extraordinary record of success and safety.
The Cancer Institute combines an integrated approach to treating cancer with St. Francis's signature commitment to excellence and compassionate care. The institute features a 14-chair outpatient infusion center, where patients can receive chemotherapy, biologic (including antibody) treatments, transfusion support and intravenous antibiotics.

Cardiac Catheterization (1-888-432-7869) 1-888-HEARTNY

In 2013, St. Francis interventional cardiologists performed more than 10,000 cardiac catheterizations and nearly 3,000 percutaneous coronary interventions (angioplasty and insertion of stents). The hospital is also recognized as one of the East Coast's highest volume centers for catheter-based techniques to close atrial septal defects and patent foramen ovale.

Cardiac Diagnostic Imaging (516) 705-6627

St. Francis Hospital has contributed to major advances in noninvasive cardiac diagnostic imaging. As a result, heart disease can be detected at earlier stages and diagnosed with greater accuracy, enabling more specific guidance of a patient’s treatment. The hospital has all of the major cardiac imaging modalities under one roof. St. Francis was the first hospital on Long Island to introduce 64-slice CT scanning for CT coronary angiography and recently introduced the first hospital-based cardiac PET/CT program on Long Island. Noninvasive imaging services include CT angiography, cardiac MRI, SPECT/CT nuclear imaging, transesophageal echocardiography, three-dimensional echocardiography and stress testing with nuclear, echocardiographic or MRI imaging.

Cardiac Diagnostics and Treatment

St. Francis Hospital performs more cardiac surgeries than any other hospital in New York state and has been consistently recognized for its outstanding quality of care. For 2014–2015, St. Francis Hospital has been ranked again as one of America’s Best Hospitals by U.S. News & World Report for cardiology and heart surgery.

To consult with a St. Francis physician, call 1-888-HEARTNY

Cardiac Fitness and Rehabilitation (516) 629-2040

The St. Francis Cardiac Fitness and Rehabilitation Program is housed at the DeMatteis Center in Greenvale. It is the largest and longest established medically supervised program of its kind on Long Island.

Cardiac Surgery (1-888-432-7869) 1-888-HEARTNY

In 2013, 1,398 open heart surgeries were performed at St. Francis Hospital. The hospital’s cardiothoracic surgeons have the combined experience of more than 15,000 open heart procedures in the last 10 years alone and are experts in all types of heart surgery, from conventional, open heart bypass to off-pump coronary artery bypass to the newest, minimally invasive valve procedures, including surgical techniques designed to treat certain cardiac arrhythmias.
Center for Advanced Cardiac Therapeutics . . . (516) 629-2090
The program offers all-inclusive care for congestive heart failure patients and over the years has been recognized for its high survival rates.

CPR . . . . . . . . . . . . . . . . . . . (516) 629-2036
As an American Heart Association Community Training Center, St. Francis Hospital offers CPR classes to all health care providers, paraprofessionals and laypersons.

Development . . . . . . . . . . . . . (516) 705-6655

Diabetes Care Center. . . . . . . . . (516) 629-2045
The Diabetes Care Center of St. Francis Hospital provides a comprehensive educational program for diabetics and their families.

Pastoral Care . . . . . . . . . . . . . (516) 562-6720
The spiritual needs of individuals of all denominations are addressed.

Physician Referral . . . . . . . . . . (516) 562-6199
Access to the expertise of St. Francis’s physicians and broad range of hospital programs and services is available.

Surgery . . . . . . . . . (1-888-432-7869) 1-888-HEARTNY
St. Francis offers an outstanding program in noncardiac surgery, including some of the most advanced technology and minimally invasive techniques available for vascular, prostate, ear-nose-throat, abdominal, gastrointestinal, oncologic and orthopedic surgery. The hospital has been ranked by U.S. News & World Report as one of the Best Hospitals in America for eight years in a row for noncardiac specialties such as geriatrics; neurology and neurosurgery; gastroenterology and GI surgery; and orthopedics (2014–2015).

Volunteer Office . . . . . . . . . . (516) 562-6105

Women’s Health Center . . . . . . . (516) 629-2400
St. Francis’s Women’s Health Center is a state-of-the-art imaging center committed to women’s health and education.

Please call (516) 562-6199 for the latest information on services.
Located in Bethpage, St. Joseph Hospital was awarded The Joint Commission Gold Seal of Approval® and has been recognized by the American Nurses Association’s National Database of Nursing Quality Indicators® for outstanding commitment to quality patient care (2011–2013). The 203-bed hospital, which joined CHS in 2010, offers magnetic resonance imaging (MRI), nuclear medicine and a vascular laboratory in its array of fully digital radiological services. Many specialized services are available, including high-level skin grafting and vascular assessment, and adult and pediatric speech, voice and swallowing therapy.

St. Joseph provides residents of the surrounding communities the expertise of its nationally accredited outpatient Diabetes Education Center, balance testing for vestibular disorders and outpatient physical therapy (with additional specialization in balance disorders). Outpatient services also include sleep disorder studies in the nationally accredited Center for Sleep Medicine with six hotel-style rooms and hyperbaric oxygen therapy in the first wound healing center on Long Island to be accredited—and reaccredited—by the Undersea and Hyperbaric Medical Society.
St. Joseph is one of the few hospitals on Long Island using the Arctic Sun Temperature Management System, which is used to preserve life and prevent brain damage resulting from oxygen deprivation in cases of cardiac arrest. This system lowers the body’s core temperature to 91 degrees, slowing metabolism and preventing dangerous brain swelling. All of the hospital’s critical care and Emergency Department (ED) nurses are trained in the use of this procedure. ED nurses apply insulated pads with cold water circulating through them to the patient’s skin, effectively reducing the body temperature both quickly and safely. Unlike other cooling methods, Arctic Sun is both effective and noninvasive, presenting very minimal risk to the patient. Thanks to this technology, along with the proven experience, teamwork and professionalism of St. Joseph’s staff, patients’ lives have been saved.

Expert plastic surgeons offer individualized, personal care in a modern, state-of-the-art ambulatory center at a reasonable cost. Additionally, a full range of advanced urological services are offered, including endoscopic treatment of stones using holmium laser and fiber-optic instruments, laparoscopic renal tumor removal, cryoablation of renal masses, GreenLight laser therapy for prostatic hypertrophy and extracorporeal shock wave lithotripsy (ESWL)—a minimally invasive treatment—for renal or ureteral stones.

St. Joseph has been in a continual process of updating its physical plant. Completed areas include the Critical Care Unit, Telemetry Unit, the B Unit, hyperbaric and wound care, radiology (including the outpatient waiting area), MRI, the vascular laboratory, the inpatient waiting area and central registration. The Center for Swallowing, Speech and Voice Disorders suite, main lobby, ED lobby and ultrasound facility are also newly renovated. In addition, to accommodate patients’ schedules, hours of operation for MRI and computed tomography (CT) procedures have been expanded, and both “Rapid Access” and “Fast Track” are now available in the ED.

**Highlights**

- Accredited by the American College of Radiology for CT, MRI and nuclear medicine.

- Diabetes Education Center of Excellence, as recognized by the American Diabetes Association and the American Association of Diabetes Educators.

- First facility of its kind on Long Island to earn accreditation—and reaccreditation—from the Undersea and Hyperbaric Medical Society.
Above national average for patient safety, ranking fourth on Long Island and second for Nassau County, according to Consumer Reports (2013).

Accredited by the American Academy of Sleep Medicine.

The Joint Commission Gold Seal of Approval®, signifying full accreditation by the nation’s predominant standards-setting body in health care.

Directory

Ambulatory Surgery Unit . . . . . . . . . (516) 520-2471
A private and separate unit designed for patients requiring same-day-stay surgical procedures, with private parking for patients’ convenience.

Care Management/Social Work . . . . . . . (516) 520-2462
Registered nurses and social workers employ a comprehensive, interdisciplinary approach to discharge planning.

Center for Swallowing, Speech and Voice Disorders . . . . . . . . . . . . . . . . . . . (516) 627-3036
The center provides a comprehensive variety of treatment modalities for adults and children. The program offers evaluation, diagnosis and treatment for speech, language, cognitive and swallowing disorders.
Community Health Lectures . . . . . . . (516) 520-2487

Computed Tomography (CT) Services . . . (516) 520-2600
The department features a completely upgraded, state-of-the-art, multislice CT scanner. Reports are interpreted by a board certified radiologist who is available to the physicians for consultations. All technologists are licensed by New York state and specialize in CT.

Development . . . . . . . . . . . . . . . . . . . (516) 520-2302

Diabetes Care Center/
Diabetes Club Support Group . . . . . . . . . (516) 520-2214
Specific self-management skills and knowledge are offered to diabetics to prevent complications. St. Joseph’s goal is to help patients with diabetes live a long and healthy life.

Echocardiography . . . . . . . . . . . . . . . . . . (516) 520-2495

Emergency Department . . . . . . . . . . . . . (516) 520-2201
The main emergency area is staffed by emergency physicians only; the Fast Track and new Rapid Access areas are equipped to handle less severe yet urgent cases with great care in a timely, efficient manner.

Endoscopy Unit . . . . . . . . . . . . . . . . . . . (516) 520-2650
Upper, lower and complex endoscopies are performed as outpatient procedures for evaluating symptoms such as abdominal pain, rectal bleeding and related issues, as well as to screen for cancer.

ENT (Otolaryngology) . . . . . . . . . . . . . . . (516) 520-2387
Family Medicine . . . . . . . . . . . . . . . . . . . (516) 520-2387
Gastroenterology . . . . . . . . . . . . . . . . . . . (516) 520-2387
Geriatrics . . . . . . . . . . . . . . . . . . . . . . (516) 520-2387
Hearing and Speech Center . . . . . . . . . . . . (516) 520-2667
Hospice . . . . . . . . . . . . . . . . . . . . . . . . (631) 465-6363
Compassionate, interdisciplinary inpatient hospice care is provided for patients, in conjunction with certified hospice workers, registered nurses, nursing assistants, social workers and pastoral care providers.
Hyperbaric and Wound Healing Outpatient Center. (516) 520-2788
In the first center on Long Island accredited by the Undersea and Hyperbaric Medical Society, comprehensive wound care services are provided for the treatment of chronic, nonhealing and poorly healing wounds. The center, which has extended hours to accommodate patients’ schedules, has a 90% overall healing rate.

Intensive Care Unit (516) 520-2435
Internal Medicine (516) 520-2387
Laboratory (516) 520-2242
Lithotripsy (516) 520-2387
Patients are admitted through the Ambulatory Surgery Unit for lithotripsy, which uses sound waves that pass easily through the body, but are strong enough to break up kidney stones.

Mammography (516) 520-2600
The Mammography Department is accredited by the American College of Radiology (ACR), and all technologists are licensed and meet ACR criteria for mammography. Radiologists are also accredited through the ACR and are highly qualified in interpretation of mammography.

MRI (516) 520-2600
Neurology (516) 520-2387
Nuclear Medicine (516) 520-2336
The Nuclear Medicine Department uses the injection of radioisotopes to image different structures of the body. Routine examinations such as bone scans and biliary scans are performed on a daily basis by a certified nuclear medicine technologist. These images are reviewed and interpreted by a board certified radiologist.

Oncology (516) 520-2387
Ophthalmology (516) 520-2387
Oral Surgery (516) 520-2387
Orthopedics (516) 520-2387
Pain Management (516) 520-2387
Palliative Care . . . . . . . . . . . . . . . (516) 520-2387
Palliative care staff aim to reduce the severity of symptoms for seriously ill patients and support patients and their families during treatment, at any stage of a disease. Unlike hospice, palliative care can be initiated at any stage of illness, from diagnosis to advanced disease.

Pastoral Care . . . . . . . . . . . . . . . (516) 520-2706
The spiritual needs of individuals of all denominations are addressed.

Pathology . . . . . . . . . . . . . . . . (516) 520-2374

Pharmacy . . . . . . . . . . . . . . . . (516) 520-2323

Physical Therapy . . . . . . . . . . . . . . (516) 520-2278
Rehabilitation is offered to patients experiencing neuromuscular, orthopedic or other disabilities.

Physician Referral . . . . . . . . . . . . . . (516) 520-2500
Access to the expertise of St. Joseph’s physicians and broad range of hospital programs and services is available.

Stroke Center . . . . . . . . . . . . . . . . . (516) 520-2415
The Stroke Unit offers care to patients who have been admitted with a diagnosis of stroke or stroke-like symptoms. Registered nurses are specially trained in the care of this patient population.
Using hyperbaric oxygen therapy and other treatments, a highly credentialed and experienced team help patients with chronic, nonhealing and poorly healing wounds resulting from injuries, diabetes, vascular disease or other conditions.

Please call (516) 520-2500 for the latest information on services.
For more than 100 years, Catholic Home Care has been delivering care to people in their homes, across Long Island. Founded by the Congregation of the Infant Jesus, the sisters have provided care to the sick and dying without regard to a person’s religion, race, gender or economic status. Today, the entire staff, who come from diverse backgrounds, work closely with the sisters. Despite the developments that have occurred over the years, the original commitment remains the same—from the moment the staff enter a home until the last contact with that patient, personnel will endeavor to offer the most comprehensive and compassionate health care available.

Catholic Home Care manages home care services for approximately 2,000 patients daily across Long Island. Specialized services include skilled nursing care, physical and occupational therapies, medical social work, maternal-child and pediatric services, home health aide assistance, nutritional counseling, pastoral care, infusion services, telehealth, wound care and behavioral health services.

CHS Home Support Services supplies medical equipment, oxygen and related delivery systems, including the oxygen compressor device for home use. CHS Home Support Services is noted for excellent customer service relations, courteous delivery staff and a skilled, caring, professional staff of respiratory therapists.
Focusing on providing equipment and services that help patients remain in their homes, the goal of CHS Home Support Services is to give patients the needed care and technology, ensuring comfort and safety in the home environment.

For 6 years in a row, Catholic Home Care has been ranked by HomeCare Elite™, a nationally recognized award program, within the top 25% of home care agencies in the country for financial and clinical outcomes. For 5 consecutive years, Catholic Home Care has had the further distinction of being listed with the best 500 out of 26,000 home care providers nationwide.

Good Samaritan Nursing Home

Located just a block from the Great South Bay in Sayville, the 100-bed Good Samaritan Nursing Home has been part of Good Samaritan Hospital Medical Center since 1980. The residents of the nursing home are a medically complex population requiring the full-time care only a skilled nursing facility can provide.

The nursing home’s size allows for personal attention to individual needs. All team members are easily reached by residents and families. Even the head chef knows each resident and the specific nutritional requirements and/or preferences. Every effort is made by the experienced dietary staff to provide customized entrées and nutritional snacks, never losing sight of the social significance of sharing a meal with another person. A variety of food accompanies enjoyable recreational programs.

The location of the facility is uniquely beautiful. Good Samaritan Nursing Home is situated in a lovely, residential area of Sayville, within a one-block walking distance of the bay. Residents frequently enjoy picnic lunches at the seashore during the summer months.

The spiritual needs of residents are very important to the staff. A full-time chaplain, the availability of a priest and a lively corps of pastoral care volunteers provide daily support to enhance a living faith for all denominations. This includes the prayerful presence of staff for the benefit of residents and family members during times of crisis, particularly dying and death.

Good Samaritan Nursing Home is fortunate to have the services of the Good Shepherd Hospice program available to residents who are terminally ill. This assists family members and enables palliative support to continue in a professional environment.

Specialized programs include personalized attention, physical, occupational and speech therapy, fall safety, a dementia program, wound care (with a certified wound care nurse), recreational therapy (with an ADA-equipped transport bus), psychological services, dental services, interfaith spiritual services and an onsite certified nursing assistant training program.
Services Include:

- 24-Hour Nursing Care
- Cancer Care
- Caregiver Support Groups
- Diabetes Management
- Full-Time Medical Staff
- Occupational Therapy
- Orthotic/Prosthetic Service
- Physical Therapy

Good Shepherd Hospice

Good Shepherd Hospice was created in 2001 with the merger of Good Samaritan, St. Charles and Mercy hospice services and represents a combined 30 years of experience serving the community. Its purpose is to offer quality of life by enhancing health care at the end of life for individuals and their families across Long Island, while educating the community on the philosophy of hospice services.

There is a commitment to facilitate earlier referrals to hospice services so patients and their families can be supported as they make decisions regarding care. Through its community outreach programs, Good Shepherd Hospice continues to inform both the public and professionals in an attempt to eliminate barriers to hospice care and further develop connections in the community. Good Shepherd Hospice is Medicare-certified and operates under the Conditions of Participation for Hospice Care. Hospice care is also covered under most private insurance plans, as well as Medicaid.

A patient is eligible for hospice services if his or her physician and the hospice medical director certify that the patient has a life expectancy of less than six months if the disease runs its normal course. While enrolled in hospice, the patient is not receiving curative treatment.

Services Include:

• Medical and Nursing Management of Physical Symptoms
• Counseling Services
• Pastoral Care
• Home Health Aide Assistance
• Dietary Consultation
• Physical, Occupational, Speech and Respiratory Therapies
• Medical Supplies, Equipment and Laboratory Services
• Short-Term Inpatient Admission for Symptom Management and Respite
• Delivery of Prescription Drugs for Pain and Symptom Management and Comfort
Hospitalization and Short-Term Care for Inpatients:
Hospice is an approach toward care, not a specific place. Although hospice services may be offered in a hospital, inpatient center, skilled nursing facility or an assisted living residence, care is most often given in the patient’s or family member’s home. There are many factors to consider when making the decision to have a loved one hospitalized. When a hospice patient is receiving care in a hospital setting, the goal is to effectively manage the patient’s symptoms and maximize the quality of life. Once the patient’s symptoms are effectively managed and the physician feels the patient no longer needs to be hospitalized, the hospice social worker will partner with the patient and his or her family on a discharge plan. The social worker and nurse will be available to discuss possible care options for the patient. Each situation is unique, and every discharge plan is individualized.
Maryhaven Center of Hope

Maryhaven Center of Hope owes its existence to a small community of nuns from France known as the Daughters of Wisdom. In 1907, the Daughters of Wisdom established their first school in Port Jefferson. The sisters created the Wharton Memorial Institute for children with disabilities, with funds bequeathed by William Wharton. The building was blessed by the Right Reverend Thomas E. Molloy on July 20, 1930. In 1961, the school was renamed Maryhaven to better reflect the scope and purpose of a progressive educational environment.

Today, as one of the largest and most innovative multiservice agencies on Long Island, Maryhaven supports more than 2,100 individuals of all ages who may be autistic and/or intellectually disabled or in need of psychiatric or alcohol/substance abuse services. Through programs and services that focus on the potential—not limitations—of people with special needs, Maryhaven is able to build confidence, improve self-esteem and encourage community integration. The staff, educators and caregivers honor the agency’s distinctive history, while continuing to provide the kind of assistance, leadership and opportunities that have been helping people overcome challenges for 85 years.

For information on the following Suffolk County services, please call (631) 474-4120:

Caring for Children: At Maryhaven, children have the opportunity to achieve their potential and become participating members of the community. Central to this mission is the Maryhaven School and Residential Program (inclusive of three children's homes and four dormitory-style residences). Situated in the seaside village of Port Jefferson, it is a supportive and caring environment that cultivates positive behavioral choices and social interaction. With certified educators and caring professionals, it offers a full scope of educational and residential options, including clinical, medical, dietary, social services coordination and admission/discharge planning to help children live and learn fully.

Caring for Adults: Maryhaven has 32 adult homes, 17 leased apartments and a 4-bed training house in Suffolk County, offering adults (21 and older) with intellectual disabilities/autism an opportunity to live in the community and enjoy its resources, while receiving individualized support and assistance with life management.
A service plan is developed for each person, focusing on his/her life goals and areas for growth and development. Residential and clinical staff provide supervision and support for individuals in an enriched environment and a setting they can call home. The agency’s newest group home, Angel Guardian, provides around-the-clock nursing care for people who are medically fragile. Individuals live in the least restrictive residential setting that will meet their direct care needs and appropriate level of support.

**Vocational/Placement Programs:** Vocational evaluations, vocational counseling and training assist adults in learning the skills necessary to participate in Long Island’s workforce. Through training in social/communication skills and work habits, the goal of the program is for each participant to obtain employment within a range of community-based options or in one of Maryhaven’s own work centers. These work centers provide opportunities in document imaging, microfilming, packaging/assembly, shredding and commercial printing. Some individuals, with supervision, are able to function in the outside labor force. If additional help is required at the outset of a new job, a Maryhaven job coach provides step-by-step training, accompanying that person to offer support until the job is mastered.

**Day Habilitation Programs:** A total of 10 day habilitation programs serve people with intellectual and psychiatric disabilities. Each “day hab” focuses on the individual’s needs and preferences, such as culinary arts, autism spectrum needs and performing arts, to name a few. These programs teach skills for daily living, offering clinical support to reduce behavioral difficulties and providing rehabilitative support to allow individuals to maintain a productive life in the community.

**Service Coordination:** This is a person-centered approach toward empowering participants, enabling them to be independent in their daily activities. Advocacy, service linkage and service coordination are primary functions provided to individuals and their families.

**Weekend Recreational Respite:** Located at Maryhaven’s Yaphank facility, the program operates on Saturdays from 10:00 am to 2:00 pm. Families and/or other caregivers living with and caring for those with disabilities face a multitude of challenges. The program affords opportunities for therapeutic recreation and provides respite for caregivers’ families.

**Mental Health Concerns/Substance Abuse:** Personalized Recovery Oriented Services (PROS/Steps to Life) in Suffolk County, offered in Yaphank and Riverhead, are certified programs that provide clinical support, day services and service coordination to assist individuals recovering from mental illness or co-occurring disability in developing and attaining goals for themselves in the following areas: vocational, educational, social and residential.
Affordable Senior Housing: Wisdom Gardens is a first-of-its-kind housing initiative, aimed at providing affordable housing to both senior citizens and individuals with intellectual disabilities. The complex, located on Terryville Road in Port Jefferson Station, includes 40 affordable senior housing apartments, with 6 apartments reserved for intellectually disabled individuals and a community center to serve the residents.

For information on the following Nassau County services, please call (631) 474-4120:

Personalized Recovery Oriented Services (PROS): This program is committed to assisting individuals recovering from the disabling effects of serious mental health concerns through coordinated delivery of an individualized array of rehabilitation, treatment and support services.

Senior Network and Drop-In Center (Day Programs): This grant-funded, Office of Mental Health (OMH) recreation and socialization program is for individuals age 55 and over who have been diagnosed with mental illness. This is the only one of its kind in Nassau County.

Office of Alcohol and Substance Abuse Services (OASAS) Residences: Three facilities focus on meeting the needs of individuals with substance abuse. New Hope is a crisis center that accepts outpatient, inpatient and residential referrals for individuals battling substance abuse addiction; it is not a detox center. Mercy Hall and Recovery House focus on personal recovery, counseling, vocational evaluation, education and training, housing potential and sometimes reunification with family.

Office of Mental Health Residences: There are 3 OMH group homes and a supported housing program consisting of 12 apartments. One of the group homes serves as a transitional residence for higher functioning individuals with a psychiatric background. The other two are for individuals with dual MI/MR diagnosis. The supportive apartment program serves individuals who are more independent and is designed to offer permanent housing to those who no longer require daily or weekly supervision.

Our Lady of Consolation Nursing & Rehabilitative Care Center

A 450-bed facility located in view of the Great South Bay in West Islip, Our Lady of Consolation Nursing & Rehabilitative Care Center—which was established in 1894 by the Sisters of St. Dominic—offers a comprehensive array of services and programs designed for adults and geriatric patients.

Skilled nursing care at the facility includes geriatric care, rehabilitative care and medically complex care. In addition, Our Lady of Consolation offers a long-term home health care program, which includes a coordinated plan of care and supportive services to disabled and chronically ill individuals choosing to reside in their own homes. Onsite, 24/7 respiratory therapists are available, as well as full-time, onsite, specially trained medical staff.

Our Lady of Consolation, recipient of the 2014 HANYS Pinnacle Award for Quality and Patient Safety, earned a five-star rating from the Centers for Medicare & Medicaid Services and was ranked again among the Best Nursing Homes by U.S. News & World Report (2014–2015). It offers residential care to 450 short-term and long-term residents. Nursing care features an interdisciplinary approach to optimize the quality of care received by residents. Specialized programs result in positive clinical outcomes, in addition to enriching each resident’s quality of life. These goals are achieved by residents’ families working together with the staff.

Services include sub-acute rehabilitation, pain management, tracheostomy, respiratory and parenteral care, nursing rehabilitation, wound care and dementia-focused attention. There is also an active pastoral care program, comprised of staff and trained volunteers who work closely with the clinical team. Our Lady of Consolation is fortunate to have the services of the Good Shepherd Hospice program available to residents who are terminally ill. This helps to assist family members and enables palliative support to continue in a professional environment.
A very active, person-centered recreational program is coordinated by a team of therapists. They facilitate various activities, trips and celebrations to enhance residents’ social and emotional life.

St. Catherine of Siena Nursing & Rehabilitation Care Center has been serving Smithtown and its surrounding communities since 2000. It is a 240-bed, hospital-based, skilled nursing facility providing sub-acute, short-term rehabilitation and long-term care, as well as specialized dementia care programs. St. Catherine of Siena provides quality, resident-centered care in an environment that offers all the comforts of home, including a lovely garden, as well as amenities such as onsite banking, an onsite salon and an auditorium.

The expanded rehabilitation department is open 7 days a week and is staffed with 25 licensed, professional specialists in physical, occupational and speech-language pathology. The staff offers quality, state-of-the-art rehabilitation programs and modalities, to ensure patients’ transition into their homes and communities at their maximum level of physical functioning. In addition, specialized programs in cardiopulmonary, stroke rehabilitation, wound care, pain management, amputee and orthopedics are offered, to better assist patients with a wide variety of health management challenges.

St. Catherine of Siena Nursing & Rehabilitation Care Center was awarded five stars by the Centers for Medicare & Medicaid Services and again named one of the Best Nursing Homes by *U.S. News & World Report* (2014–2015).
