

Safety first. For you. For all.

Our practice has implemented a number of safety measures. All rooms, hallways and common spaces are continually sanitized to maintain a germ-free environment.

Here's how you can help:

Be prepared.

We screen everyone—providers, staff and patients, for symptoms prior to entering the practice space. Our physicians and staff will be wearing masks.

If you're not feeling well, call before you come

so we can recommend the right care. Catholic Health eVisit offers "virtual visits" with a physician, including your own doctor, from the comfort of your own home.

We've reconfigured our waiting room to ensure safe distancing.

Wear a cloth face covering or surgical mask.

Protect yourself, protect others.

Wash or sanitize your hands,

especially after touching any surfaces.

Cough or sneeze into your elbow or a tissue.

Throw tissues in the trash.

Do NOT touch your face.

This is the most important precaution of all.

Patients may be asked to wait in their vehicle until the exam room is available.

Exceptions may include patients who are wheelchair-bound or who arrive via public transportation.

Visit chsli.org to learn more about how we are keeping you safe in all Catholic Health locations.
